Integrating Trauma-informed Care into Practice:

Using a trauma-informed lens with substance use disorder and criminal justice involved populations

As a grantee of the SAMHSA, Arizona Health Care Cost Containment System (AHCCCS) is committed to outreaching and screening that bridges incarceration to outpatient treatment for individuals with Opioid Use Disorders (OUD). Research has found that when Medication-Assisted Treatment (MAT) is implemented, 55.9% of those individuals do not relapse or recidivate. The Trauma-Informed Care (TIC) trainings will provide education regarding the prevalence of trauma that often comes hand in hand with substance abuse, how to better address trauma, and how to infuse TIC into all practices to better serve the client.

Who should attend? MAT providers, substance use disorder treatment providers, justice system partners, and other behavioral health professionals. The education and training sessions are designed to provide an overview of TIC and how to integrate TIC into best practices.

Learning objectives:
- Overview of TIC and the prevalence of trauma in the substance use disorder and criminal justice populations.
- Integration of TIC into current best practice used by treatment providers.
- Identify strategies for integrating TIC into everyday practices.
- Overview of Compassion Fatigue and Self-Care in the helping profession.
